

In honor of the Chinese year of the Wood Dragon, I am offering a new course on all things Dragon/s.

In the Chinese culture the Wood Dragon is meant to foster success, progress and abundance. However, all over the world in myth and cultures, they are associated with the elements, as spirit guides, and in awakening one's primordial energies.

2024 is an important choice year on so many levels to ignite your inner powers and identify your inner dragon.

Are you ready to:
